## Sport stacking... Say what?

When I first became passionate about sport stacking in 1995, a lot of people would hear about it and scratch their heads. This is a sport? The only way to explain it was to show them firsthand—sport stacking is truly something you have to see to believe! I absolutely love the challenge of turning skeptics into believers, and the list of sport stacking enthusiasts grows every day.

Kids don't need to be convinced about the benefits of sport stacking. They just plain love it! (even your "way too cool for it" kids). For teachers and parents, we've always touted hand-eye coordination, ambidexterity and increased fitness levels. We now can substantiate those claims. A university study by Dr. Brian Udermann, currently at the University of Wisconsin-Lacrosse, confirms that sport stacking improves hand-eye coordination and reaction time by up to 30 percent. Who would have guessed that something so simple and fun could be so effective?

Innovative teachers around the world are discovering sport stacking with Speed Stacks, and the sport's popularity continues to grow exponentially. Many teachers with existing programs are discovering all the new fitness activities that have been added to the sport recently. We're proud of being adopted into so many quality programs and are excited to see the enthusiasm teachers everywhere are bringing to the sport. If you're one of those innovators, I want to welcome you into our stacking family and let you know we at Speed Stacks are dedicated to doing everything we can to support you and your students.

The Instructor Catalog was developed with you in mind. I was a teacher for 17 years (five of those in physical education), and I've taken great care to assure the products we offer are affordable, well-made and totally backed by quality customer service. Take a look at our Sport Pack—it's everything you need to get a first-class sport stacking program started (right down to the easy-to-organize, easy-to-store case) – all at an affordable price.

Enjoy and *Stack Fast!*
